

Aesthetician Services

In addition to procedures offered, maintaining your investment is a wise choice. Christy, our Aesthetician, will assist you with your individual skin care needs including facials, chemical peels, and consultations on skin care products and their use.

Deep Pore Cleansing Facial

This facial is perfect for oily or congested skin. First, your skin is thoroughly cleansed and exfoliated. Steaming and manual extractions are performed for cleansing blackheads and congestion from the skin. A clay mask is then applied to draw out impurities in the skin. This facial is perfect for acne prone skin. This healing, result oriented facial reduces oiliness without drying and gives the skin the hydration that it needs. 60min. \$85

Calming Facial

This facial is designed for post Fraxel laser treated skin or for someone with sensitive skin. The facial addresses the need for hydration and calming of the skin along with gentle exfoliation of dead skin cells turned over by the Fraxel treatment. This facial not only helps speed healing time, but is also very relaxing as you are pampered with a facial massage and the soothing scent of essential oils. 30min. \$45

Chemical Peel

Superficial chemical peeling removes the uppermost layers of the skin. Salicylic acid, or Glycolic acid, gently lifts dead, dull cells on the skin and stimulates renewal of the skin. Immediately after, the skin feels smooth and tight. Acne, fine lines and brown spots are improved through a series. Enlarged pores are lessened and texture becomes more refined. Skin appears and becomes healthier. \$75.00 Peel with extractions \$85

Series of 6 peels \$350
