Aesthetician Services

*In addition to procedures offered, maintaining your investment is a wise choice. Sandy, our Aesthetician, will assist you with your individual skin care needs including facials, chemical peels, permanent makeup, and consultations on skin care products and their use.*

Why professional peels are important:

Chemical Peels are used to treat aging skin by improving the texture, reducing hyper-pigmentation, eliminating mild wrinkling, and controlling skin disorders such as Acne and Rosacea. They are one of the most common of all cosmetic procedures performed.

Peels

**Rosacea Peel** – 35% glycolic acid with Green Tea and Chamomile makes this solution perfect to accelerate the healing process without affecting the peeling process. Green Tea is an anti-inflammatory & alleviates redness.

**Acne Peel** – This peel contains 35% Salicylic Acid, giving maximum results to prevent sebum blockage and ease extractions. Can be used to control in-grown hairs.

**Glycolic Acid (30% - 70%)** – These peels are excellent for sun damage, lines and wrinkles, leaving the skin smooth with a healthy glow.

**Jessner** – Consists of 3 different acids: 14% Lactic, 14% Salicylic, 14% Resorcinol. Each plays a different role in resurfacing the skin. These 3 ingredients work synergistically, to diminish wrinkles, lighten hyper-pigmentation, control acne, and slow down the production of excess oil.

All peels: \$85.00/each

In order to achieve optimum results, we recommend a

Series of 3 peels for \$225

Added to Peel \$15.00 additional

Facials

Deep Pore Cleansing Facial

This facial is perfect for oily or congested skin. First, your skin is thoroughly cleansed and exfoliated. Manual extractions are performed for cleansing blackheads and congestion from the skin. A clay mask is then applied to draw out impurities in the skin. This facial is perfect for acne prone skin. This healing, result-oriented facial reduces oiliness without drying and gives the skin the hydration that it needs. \$85

Calming Facial

This facial is designed for post Fraxel laser treated skin or for someone with sensitive skin. This facial addresses the need for hydration and calming of the skin along with gentle exfoliation of dead skin cells turned over by the Fraxel treatment. This facial not only helps speed healing time, but is also very relaxing as you are pampered with a facial massage and the soothing scent of essential oils. \$45
